Extremely fun! I love the feature of being able to design your own units. Although this game does get boring eventually, it is still worth buying and you will thoroughly enjoy it!

Also, try not to grind easy levels too much- it can ruin the fun!

. OVIVO. Wow. What to say? It's as beautiful as it is simple, the whole game is more of a living art piece than anything else, from the sublime minimalist drawings that make up the stages to the serene soundtrack by brokenkites, the whole it comprises is amazing. It's not fun, it's not ground-breaking, it's just the game equivalent of a meditative walk through a temple garden.

Now, it's not easy. At times, it can be grueling. Whether this is by design, an involuntary effect of slow response time or just me being bad at games, I don't know - but it *is* very hard at times. But the beauty of it more than enough makes up for that. I dare say that this is the single most beautiful thing to come out of Mother Russia. It might even be the most beautiful thing to ever come out, ever, full stop, who knows? But definitely the top thing out of Mother Russia.

It's not for everyone, but for those who can appreciate art in game form, it's a no-brainer. It's also the third really good game I've played from Russia recently, so I'm just thinking: you've got a huge population, and a lot of computer literate people. This is a good trend, I hope you keep it up. Make more of those awesome games and send them my way. Don't argue, just keep em coming. Game have some issues, but overall it's fun. 7/10. Over 1500 hours played.... 'nuff said. Best be ready for pixel perfect button presses. Fat Chicken is an interesting twist on the strategy genre. It's made by some industry vets who have worked for Insomniac Games, Red Storm Entertainment, and Westwood Studios. The creative director was heavily involved in the Command and Conquer series (a personal favorite of mine in the strategy genre) and the experience behind this title shows. You spend each mission trying to make as much money as possible beefing up farm animals (including poultry as the name suggests) using towers to fatten up, genetically enhance, water, and medicate your animals. While I have not experienced all of the perks or upgrades yet (I am still in the process of finishing the game) I would like to mention that you are not limited to just a few tower options. Special skills and tower upgrades are available. It's got learning curve that makes it easy to get into and a lot of ways to get the most money and meat out of your animals. This is a definite buy for originality, personality, and just plain fun.

I spent 40 minutes playing Chapter 1 and that's with being called away often due to the family. It's pretty simple to follow only hard point I encountered were the really camouflaged bones for the ladder.. Nice countryside rail and very nice loco. This amounts to a glorified DEMO I have played the full game at a friends place & its a compleatly difrent exp we have similar rigs & I'm using the same joypad. MotoGP 14 compact is nowere near as good as the full game it realy sucks

. That a nice racing game. gt;Trade draft picks to acquire players that all went to the same college
>Trade other players for rag tag group of QBs that have bad stats but have "potential"
>Average 2-14 next four seasons
>Get fired
>Select to ignore the firing
>Offer insane contracts to the rag tag QBs that still have "potential"
>Move franchise from Philly to Orlando
>Trade all remaining draft picks to Dallas for nothing in return
>Switch to Dallas, and use draft picks to coach team to 6 straight Super Bowls
>Laugh as Philly Orlando crumbles into nothing

10/10 Would be Chip Kelly again
